

EXECUTIVE PROFILE

Tim Hansen, P.E.

Founder, 350Solutions

M.S., Engineering Science, Dartmouth College, 1995

B.S., Chemical Engineering, University of Virginia 1993

Tim is Founder and CEO of 350Solutions. He is a chemical engineer with more than 26 years of experience managing and conducting technology research, development, demonstration and analysis. He has a broad technical background with experience in environmental consulting for industry, clean technology development, standards development, and business management.

Tim has worked extensively with commercial clients and partners, as well as state and federal agencies on numerous research and development programs while previously at Southern Research Institute. He has a broad range of energy and technology industry expertise and a large network of industry contacts. Tim served as the lead U.S. Technical Expert for the development and implementation of ISO 14034 Environmental Technology Verification (ETV), the 2016 international standard issued to unify the protocol for the evaluation of innovative technologies. He led the U.S. working group and served Head of Delegation for international technical committee meetings and provided significant technical input in the development of the final standard.
